PERSONAL PROFILE

I am a Full Stack Web Developer. I create websites and web applications using such technologies as HTML, CSS, JavaScript, PHP, Laravel, Bootstrap, jQuery, MySQL, and such content management systems as Shopify.

Besides that, I have experience in graphic designing such as logo designing, vector portrait, cover designing, etc. I have developed a wide range of websites that can be used for university, personals, startup companies and small businesses.

My core competency lies in complete end-end management of a new website development project, and I am seeking opportunities to build websites from the ground up for you or your business.

My essential characteristics are professionalism, originality, and innovation. I place great importance on small details and try to bring something new to every project.
